Our business has gone from strength to strength since being acquired by Brookfield Asset Management in 2007. In this time, both Brookfield and Multiplex have significantly expanded their presence in all of the regions in which they operate. This is wonderful proof of our performance and reach in our respective markets. However, we felt it was time for a simpler global identity which would be better understood by our industry. Therefore, the next evolution of our brand sees us return to an identity that has timeless quality and strong brand equity – Multiplex. We have combined old with new, bringing our current positioning statement Built to Outperform to our new logo.

Although our name has changed, it’s business as usual for Multiplex. There has been no structural, organisational or leadership changes within Multiplex and no change to the way we operate.

We remain firmly part of the Brookfield Group and continue to use our joint strength in the market to minimise risk and provide the optimum outcome for our clients.

Our reputation for delivery also remains unchanged. Our clients trust us to deliver on time and on budget – and this is proven by the significant proportion of repeat business that makes up our global workbook.

It also speaks volumes to the quality of our people. Many staff members – including ourselves – have been part of the team for decades. With over 3,600 people globally, clients benefit from our depth of knowledge and expertise, and our ability to draw on shared experience and world’s best practice.

We are immensely proud of our business and our team, and the strong relationships we have with our clients. We look forward to delivering more iconic projects all over the world under the Multiplex name and have every confidence that we will be outperforming for many years to come.

Our History

1962
Multiplex construction operations established in Perth, Australia

1978
Multiplex expanded into the eastern states of Australia

1980’s
Multiplex established operations in Southeast Asia and expanded into Development activities

1987
Multiplex expanded into the ACT, Australia

1989
Multiplex expanded into South Australia and Queensland, Australia

1997
Multiplex established offices in the Middle East

1998
Multiplex Facilities Management business established

1999
Multiplex expanded into the United Kingdom

2003
Multiplex listed as a public company on the ASX

2007
Brookfield Asset Management acquired Multiplex’s listed operations

2010
Multiplex becomes Brookfield Multiplex

2011
Brookfield Multiplex Canada established

2012
Brookfield Multiplex India established

2016
50 year milestone Australasia

2016
Brookfield Multiplex rebrands as Multiplex
Global Construction Platform

With 3,600+ people globally, we have a mobile workforce that collaborates to share knowledge and apply world’s best practice across our projects.

For example, our Innovation Awards encourage our project teams to think of creative ways to manage health and safety performance on our sites, and this knowledge is shared and applied on a global scale.

In the area of quality assurance, a comprehensive peer review process ensures good governance and consistent behaviour across the business, and translates to certainty of outcome for clients.

Multiplex Advantage

Our creative, innovative thinking and can-do approach, coupled with the collaborative way we work with our clients, enables us to consistently exceed client expectations.

**DRIVEN TO EXCEED EXPECTATIONS**

High quality, safe, on-time and on-budget are baseline requirements of every one of our projects – but we strive to exceed expectations and consistently outperform.

By thinking like owners and understanding our clients’ unique requirements we deliver long term, cost-effective outcomes that add real value to projects and achieve clients’ broader business objectives. This might be completely re-designing plans to reduce floor space and generate cost savings, undertaking detailed stakeholder liaison to improve project outcomes for the community or implementing environmental initiatives to achieve world-leading accreditation.

Whatever our clients’ objectives, we tailor competitive solutions that drive best-for-project outcomes.

**INNOVATIVE THINKING**

The drive to find a better way of doing things is inherent in all of our people. We are known for innovative excellence and we involve our best thinkers at the front-end of projects to share knowledge and create tailored solutions for clients.

Each project is unique, with its own specific challenges. Combining disciplined decision-making with innovative thinking, we bring a fresh approach to often complex projects. When others say it cannot be done, we deliver.

**COLLABORATIVE WORKING APPROACH**

We recognise the value of upfront planning and work closely with all project stakeholders to drive positive, long term project outcomes for clients. Our large number of repeat clients demonstrates our ability to bring together the best skills for the job. We are proud of the fact that 65% of our projects have been for repeat clients.

By collaborating throughout the lifecycle of our projects we gain a clear understanding of our clients’ objectives, are able to anticipate risks and opportunities, and implement tailored solutions to address situations as they evolve.

"Their dedication and focus ensured that together we were able to achieve the best solutions for the project."

Janaka Wijayawardana, Emirates (client representative for the owner)
OUR SAFETY CULTURE IS BUILT-IN, NOT BOLT-ON.

Multiplex is on a continuous journey to enhance safety culture and standards across the business and the broader industry, and our clients benefit from over more than 50 years of health and safety expertise.

We work with our clients to design and integrate safety controls during the planning phase of our projects, with the aim of minimising or completely eliminating risk on our sites. We embrace the Safer by Design approach and recognise that through early planning, we stand to have a much greater impact on project outcomes.

As a business focused on the long term, we concentrate our efforts on controlling critical or high-consequence risks. We do this by looking for ways to move controls upstream to significantly reduce or eliminate risk, and we reward smart solutions through our internal Global Innovation Awards.

All of our projects work with documented management systems that are third party certified to either AS/NZS 4801 or OHSAS 18001.

REDUCING THE GAP BETWEEN PAPERWORK AND PRACTICE

We don’t simply tick a box when it comes to health and safety; we strive to have a practical impact on the safety of our projects and this is enriched by collaboration between our staff, our clients and the people we work with.

We focus less on paperwork and more on open conversation, with all of our people encouraged to share and record successes and near misses, and learn from each other in a mature culture that is driven by our leaders. We share our combined knowledge with our clients and translate our expertise to each and every project we work on.
Our Values

Care
SUPPORT, RESPECT, PROTECT. We care for the people we work with and take their safety and wellbeing very seriously. We support our people to achieve their goals and respect the things that enrich their lives. Our aim is to protect and sustain our people, our clients and the communities we work in.

Outperformance
DRIVE, PASSION AND FOCUS ON EXCELLENCE. Our business is built on our people. We are structured for success and are determined to consistently exceed the expectations of our clients and the industry in everything we do. We add genuine value to projects with our innovative thinking, our ‘can do’ attitude and the way we embrace clients as part of the team. Our entrepreneurial spirit is backed with astute, disciplined decision-making and a solid financial backbone.

Collaboration
LISTEN, SHARE AND WORK AS A TEAM. We’re totally focused on working together to deliver the best possible results. What sets us apart is our belief that the client is an essential member of our team. By involving them at the outset of every project, we develop a clearer understanding of their objectives. Together we identify challenges and work out innovative ways to optimise our clients returns.

Integrity
ETHICAL, HONEST AND OPEN. Trust is the foundation of all our relationships. By being honest, fair-minded and dependable we build long standing, valued relationships. Our clients and the people we work with put their trust in us because we do what we say we are going to do. Our approach is straightforward, upfront and transparent so everyone we deal with can be certain of the result.
MULTIPLEX: Redefining Sustainability

We see our projects as an opportunity to deliver high performance facilities that meet our clients’ unique mix of value drivers – be they environmental, social and financial.

Our approach is to engage with clients as early as possible to identify opportunities and ensure the project not only achieves their goals but delivers enduring benefits for all stakeholders.

Multiplex has delivered more than 1.2 million square metres of sustainably rated space and has led the industry in environmentally sustainable design. But we define sustainability much more broadly.

We know how building assets function and understand the important role they play in enhancing health, productivity and performance of occupants. We also know the role they play in enriching and sustaining local communities, and we go out of our way to identify and respond to the unique needs of the communities we operate in.

We think like owners and deliver facilities that have a positive impact on everyone concerned while at the same time drive long term financial gains.

Multiplex is leading the industry when it comes to measuring the performance buildings, and we are partnering with some of the world’s best minds to drive forward the sustainability agenda including the Co-operative Research Centre for Low Carbon Living (CRCLLC) in Australia and the UK Green Building Council as Gold Leaf members.

Brookfield Asset Management

Our parent company Brookfield is one of the world’s largest asset managers with more than US$225 billion of high quality property, infrastructure and renewable power assets under management.

As part of the Brookfield family, we have access to vast expertise in investing in, owning and maintaining property and infrastructure assets. We have the unique ability as contractors to think like owners and deliver assets with an understanding of what drives their long term success.

Brookfield has a 100 year history as a global investor, operator and manager of high quality assets with a focus on real estate, infrastructure, power and private equity as well as a range of public and private investment products and services.
